### THE INDIAN SCHOOL.

The Charges of Certain Parties Proven False.

Dr. Dorchester Devotes a few Words to the Defamers of the School.

THE HITES HARD HIT

Editor Citizen I spatch a few minutes as I am about to leave the city, to call attention to a

ew other matters regarding this school which the public ought to know, and shich before I close will be found ab plutely conclusive, leaving no ground shatever for the accusers to stand upon Having been advised by Mr. Hite to se certain pupils and ex pupils of the

ichool who would substantiate the stotion which have appeared in his paper, I will give the public a few samples of what I found under oath when I talked rith the pupils. One pupil said:

Q. Did you talk with Mr. Hite: Yes, sir. -How came you to talk with him?

.- He eniled me to his house, What did he want of you? He wanted to know if Mr. Creager for tied me to a wagon. I told him it fas never done, but that I was put in all for three days. That was all I told

Another Q .- Did they (the Hitee) ask you to trite anything about the school?

A -Yes, sir What did they sak you to-day?

To write about Mr. Creager.
-What did they ask you to say bout Mr. Creager?

A .- To write out if I knew of any of ās cruelty.
Q -Did you write anything?

A -Yes, I wrote, but they did not put into the paper because I did not write Q -Did they ever tell you what to

A. Yes, Mrs. Hite wrote a letter and sked me to write it in my hand writing.

Why did not Mrs ilite say, in her allness of knowledge obtained from pu als and ex-pupils, that after she had ublished this statement about a run way boy being brought back to school, ed to the tail of a wagon, by a rope round his neck, that she tried to conrm the story by a pupil that was called

The above is a slight indication what has been obtained. Nothing uld have been said about the matter. y it was due that some statement of results should be given this comunity, where the stories of the Times d been so freely circulated. I am satled that any intelligent jury can be nvinced that said stories are sheer prications of the most cruel and sensa-

nal character. The jail, or dungeon, which disturbe much the equilibrium of Mrs. Hite Lummis, does not exist as such. ere is, however, a bed-room in the dormitory-building that has been d s jail, and has been used to lock refractory pupils. This (so-called) geon is open to inspection and a visit will prove the absurdity of some of statements circulated by Mrs. Hite.

which is also in my hands, he says: pronounced success, and that the supersevere criticism I find Mr. Creager a and patience, and from the best of information, I believe him to be a man of good moral character and sobriety."

I ask an intelligent public to consider which is more entitled to credence, what Mrs. Hite personally quotes by recollection from Col. Gardner, or what I have just quoted from an official letter

over his own signature.

THE SO CALLED DEPOSITION Mrs. Hite claims that her husband has deposition which was prepared by Mr. Lummis at Isleta, in an irregular form as it admitted, because it was drawn up without the oath of any civil officer. Mr. Lummis attempted to make up for this short coming by getting a notary in Los Angeles to take his (Lummie') testimony that it was a true copy. The notary does not say it is a true copy but certifies that Lummis says it is a true copy. Why did not Lummis call upon

a notary or a justice of the peace within two miles of Isleta? Evidently for the reason that he thought such kind of documents would be more current where they were not well known. The fact is this document has some of

the most remarkable qualities. It is not only absurd in its statements, but really it does not exist, as I shall soon show. One of the absurdities is that Mr. Creager should make a bargain to employ Bautista as an instructor in carpentry, and admit him to the school some property, and also that he had some money in the bank, the bank book solely for that purpose a most preposterous statement, that a boy should be selected for that purpose when the gov- two shirts and some other things in the ernment furnishes an experienced car penter in every training school.

Another absurdity is the story of the capture. The dying boy is made to say in this spurious paper, that Mr. Creager, Mr. Liston, Mr. Weideman and Mr. Perdue and Henry Kendall all swooped down on Bautista and captured him. The document reads: "They all pulled out their pistols; Mr. Creager pulled a pistol, Mr. Liston pulled a pistol, Mr. Weideman and Mr. Perdue all pulled pustols but I do not know if Henry Kendall pulled a pistol. They all pointed their pistols at me and told me to come." This is a most ridiculous story; it must have seriously strained the inventive power of the writer of the document, for as we shall soon see it is a pure facrication. It is in proof that Mr. Creager was not present, nor Mr. Liston, nor Mr. Weide man, nor Henry Kendall; that Bautista was captured by Mr. Perdue slone; that the others were all a considerable distance away, and knew nothing of the capture until they saw Bautista riding toward Albuquerque on the seat with
